

Disaster housing responsibilities, capabilities, and resources cross a diverse array of organizations that have varied missions and vested interests in providing disaster housing assistance. No single entity working independently has the means to address the full spectrum of disaster housing challenges. The range of disaster housing options and the span of disaster housing providers depend on the type of disaster, its severity, and the adversity of impact on the existing housing situation of those affected. Housing choices and decisions are tied to employment, access to transportation and commuting time, healthcare and daycare providers, education, and even proximity to grocery stores and pharmacies – all of which form the basic fabric of our communities. We must look across all levels of government, nongovernmental organizations, and the private sector to identify key partners.

Description

Implement housing solutions that effectively support the needs of the whole community and contribute to its sustainability and resilience.

1. Assess preliminary housing impacts and needs, identify currently available options for temporary housing, and plan for permanent housing.
2. Ensure community housing recovery plans continue to address interim housing needs, assess options for permanent housing, and define a timeline for achieving a resilient, accessible, and sustainable housing market
3. Establish a resilient and sustainable housing market that meets the needs of the community, including the need for accessible housing within the specified timeframe in the recovery plan.

Training

Build or sustain this Core Capability by completing the training listed below. Enrollment instructions for these and additional courses for this Core Capability can be found at: www.firstrespondertraining.gov/frt/npccatalog.

FEMA Housing Courses
E0209: State Recovery Planning and Coordination
E0210: Recovery from Disaster: The Local Community Role
E0416: Individual Assistance Housing Group Supervisor
G0282.2: Manufactured Homes and the National Flood Insurance Program

Resource Types

National NIMS resource types represent the minimum criteria for the associated component and capability. National resource typing definitions, job titles/position qualifications and PTBs (Position Task Books) are easily searchable and discoverable through the Resource Typing Library Tool (RTL). Resource Typing definitions are provided for equipment, teams, and units. They are used to categorize, by capability, the resources requested, deployed, and used in incidents. Measurable standards identifying resource capabilities and performance levels serve as the basis for this categorization. Additional resources can be found at <https://rtl.preptoolkit.fema.gov>.

NAME	TYPE	ID
Individual Assistance Disaster Assessment Team	Resource Typing Definition	2-508-1051
