I. BACKGROUND AND PURPOSE OF REQUEST FOR EXPRESSION OF INTEREST (RFEI)

This Request for Expression of Interest (RFEI) is being issued pursuant to Proclamation No. 111 JBE 2016, Proclamation No. 116 JBE 2016, Executive Order No. JBE 2016-55, and Executive Order No. JBE 2016-60. The State of Louisiana through the Governor’s Office of Homeland Security and Emergency Preparedness (GOHSEP) administers programs funded by the Federal Emergency Management Agency (FEMA) and through the Division of Administration’s Office of Community Development Disaster Recovery Unit (OCD-DRU), administers programs funded by the United States Department of Housing and Urban Development (HUD) Community Development Block Grant (CDBG) Program for disaster recovery. The purpose of this RFEI is to retain a firm to provide grant administration and project management services.

The State received more than 30 inches of rain from August 11 to 14, 2016 (“the August 2016 Flood”) resulting in historic flooding with more than 100,000 citizens displaced. Within a few days, 20 parishes were federally declared disaster areas. More than 100,000 homes were either damaged or destroyed. The flooding inside of homes ranged from a couple of inches of water to water up to the roofline. Louisiana continues to receive afternoon summer thunderstorms. With the State’s continued rain and humidity, mold is a threat to public health and safety. Clean up efforts need to be expedited, consistent and thorough.

The State desires to offer residents an option to Shelter at Home (SAH). The SAH program will allow residents to remain in, or quickly return to, their homes. Because of the number of displaced residents, and the ensuing temporary housing crisis, as well as the large number of people remaining in their homes without adequate utility service, work under this procurement must be able to start immediately.

Under SAH, the State will contract directly with one or more construction firms capable of delivering minor, critical services on a large scale and that possess or can obtain the resources required to deliver in an expedited manner. Simultaneously, the State will direct contract with a firm to provide Program Management support to the State to help manage and control this effort. If a respondent is selected for the Program Management contract, the respondent will not be considered for a repair services contract.

The purpose of this RFEI is to solicit interest from consultants with previous experience in disaster recovery programs through FEMA’s Individual Assistance (IA) and/or Public Assistance (PA) Program(s) and HUD’s CDBG program. Responses to this RFEI, in the form outlined in the Expression of Interest Response along with a one hour interview, will be used to select a single program management firm.

The successful Respondent (hereafter “Contractor”) shall be immediately engaged in establishing and administering SAH program under guidelines recently established by FEMA for the August 2016 Flood. A more detailed Scope of Services is contained in Exhibit A. It is also anticipated, but not guaranteed, that the services under the resulting contract may expand to accommodate other programs yet to be defined, including programs occurring as a result of the August 2016 Flood as well as past and future disasters.

II. DESCRIPTION OF SHELTER AT HOME PROGRAM

Approximately 100,000 residential dwellings located within the 20 federally declared disaster areas sustained flood-related damage and are still without power, hot water or necessary repairs required to make them safe for residents. While a portion of the property owners have had the resources to make
temporary or permanent repairs to their properties in the past week, many have not. This leaves thousands of Louisiana residents without acceptable living conditions and many remain displaced from their residences.

SAH focuses only on single-family owner occupied residential properties which can be quickly made habitable allowing individuals to return to their dwellings to shelter in place. SAH is not a comprehensive repair program and will not result in the complete restoration of the dwelling. The measures taken through SAH are designed to halt the progression of deterioration of the dwelling as the result of the August 2016 Flood and provide minimal steps necessary to render the dwelling safe and sanitary to the extent possible. If a home cannot be made safe and habitable for shelter purposes for less than $15,000, inclusive of the $500 permissible small appliance option as outlined in the FEMA Recovery Program Guidance, that property is not eligible for SAH assistance, unless otherwise authorized by the State. This program reduces the demand for more costly shelter options and allows individuals to return to their homes to commence restoration of their homes. Additionally, this program reduces the immediate public health and safety threat created by prolonged exposure to heat and the growth of mold; both of which worsen respiratory and cardiovascular conditions.

Louisiana anticipates receiving up to 30,000 applications with approximately 13,500 homes eligible for repair, but there is no guarantee of the number of units to be served, as ability to estimate at this point in time is extremely limited.

Work under these contracts will be generally consistent with conducting emergency disaster operations pursuant to the Stafford Act, as amended.

The State will procure the services of multiple construction firms (“SAH Contractors”) to implement the temporary restoration of necessary services in single dwelling residences in damaged areas. SAH Contractors will be chosen based on experience in rendering similar services and local capacity to obtain materials and provide services on an expedited basis.

SAH Contractor(s) is expected to be able to complete all work orders by September 30, 2016, but not later than December 31, 2016. The State desires to have as many people as possible back in their homes by year’s end. To maximize work efficiencies, the State reserves the right to adjust workloads among the contractors on a weekly basis depending on performance, until all properties enlisted in the program are complete.

The Contractor retained through this RFEI will be responsible for determining the eligibility of applicants pursuant to the State’s SAH program guidelines, as may be amended and providing overall project management of the SAH measures performed by the SAH Contractors. Neither the Contractor nor a related entity may serve as a SAH Repair Contractor.

III. SCHEDULE OF EVENTS

The massive destruction of the floods has left a vast number of Louisiana residents displaced or living unsafely in their homes. Consequently, the following schedule is desired for the solicitation, selection and execution of the firm to support the SAH Program:

The lowest Cost Response will receive 100% of the available points for the cost component.

Remaining responses will receive points based on application of the following formula:

\[
\text{Points per Component} = \left( \frac{\text{Cost of Lowest Cost Response for the cost component}}{\text{Cost of Response Being Evaluated for the cost component}} \right) \times \text{maximum points available for the cost component}
\]

Scores for the two components will be added together to determine the total Cost Response Score.

If oral presentations are required the original scores for Experience, Staff Qualifications and Approach and Methodology may be adjusted based on this additional information, using the criteria outlined. The cost score will remain the same and unchanged.

**Announcement of Contractor**

The evaluation team will compile the scores and make a recommendation to the head of the agency on the basis of the responsive and responsible Respondent with the highest score.

The State will notify the successful Respondent and proceed to negotiate terms for final contract. Unsuccessful Respondents will be notified in writing accordingly.

The Responses received (except for that information appropriately designated as confidential in accordance with R.S. 44.1 et seq), selection memorandum along with list of criteria used along with the weight assigned each criteria; and scores of each Response considered along with overall scores of each Response considered shall be made available, upon request, to all interested parties after the “Notice of Intent to Award” letter has been issued.

The RFEI and Response of the selected Respondent shall become part of any contract initiated by the State.

The selected Respondent shall be expected to enter into a contract that is substantially the same as the Sample Contract included in Attachment IV. In no event shall a Respondent submit its own standard contract terms and conditions as a response to this RFEI. The Respondent should submit with its Response any exceptions or exact contract deviations that its firm wishes to negotiate. Negotiations may begin with the announcement of the selected Respondent.

If the contract negotiation period exceeds three (3) calendar days or if the selected Respondent fails to sign the final contract within three (3) calendar days of delivery, the State may elect to cancel the award and award the contract to the next-highest-ranked Respondent.

**VI. ADMINISTRATIVE AND GENERAL INFORMATION**

Under no circumstances may the State and the incumbent vendor and/or its representative(s) discuss the blacked-out procurement.

Any bidder, Respondent or person responding to this RFEI or state contractor who violates the Blackout Period may be liable to the State in damages and/or subject to any other remedy allowed by law.

Invoices that include ODCs shall be accompanied by evidence of prior written OSP/DRU approval of the ODC and evidence of the actual costs including, but not limited to, vendor statements, payment records, or other acceptable evidence of the actual cost of the ODC, including any costs for facilities required by the State and costs for any audits required by the State. The Contractor shall not add any fee or other “mark-up” to the other direct costs.

The identification of all such confidential data and information as well as the GOHSEP’s procedural requirements for protection of such data and information from unauthorized use and disclosure shall be provided by the GOHSEP in writing to Contractor. If the methods and procedures employed by Contractor for the protection of Contractor’s data and information are deemed by the GOHSEP to be adequate for the protection of GOHSEP's confidential information, such methods and procedures may be used, with the written consent of the GOHSEP, to carry out the intent of this paragraph. Contractor shall not be required under the provisions of this paragraph to keep confidential any data or information which is or becomes publicly available, is already rightfully in Contractor's possession, is independently developed by Contractor outside the scope of this Contract, is obtained from other public agencies, or is rightfully obtained from third parties outside of the conditions described below.

Since the information provided on individual eligible households is covered under the Privacy Act of 1974, (Privacy Act), 5 U.S.C. § 522a, the privacy of each disaster victim must be protected from disclosure to unauthorized third parties. This restriction is set forth in FEMA's Regulations at Title 44, Code of Federal Regulations (CFR) § 206.110 (j)(2)(i). The Department of Homeland Security defines PII as any information that permits the identity of an individual to be directly or indirectly inferred, including any information which is linked or linkable to that individual regardless of whether the individual is a U.S. citizen, lawful permanent resident, visitor to the U.S., or employee or contractor to the Department.

Contractor shall provide indemnification to the State for unauthorized releases of any and all PII. Contractor may share PII with third parties with whom the State has contracted for disaster related services and which have been approved by FEMA. All Contractor program related staff must sign the FEMA provided confidentiality agreement.

The Privacy Act provides for criminal penalties for the unauthorized disclosure of Privacy Act information to unauthorized third parties. Specifically, an individual who willfully discloses any such material to a third party not authorized to receive it may be convicted of a misdemeanor and fined up to $5,000.00 per occurrence.

If any misuse or unauthorized release of the information occurs due to contractor actions, the contractor agrees to waive any claims of immunity and to have future
funds de-obligated by FEMA for any and all costs incurred by FEMA that results from such misuse or unauthorized release.

Under no circumstance shall the Contractor discuss and/or release information concerning this project without prior express written approval of the State.

All of the reports, information, data, et cetera, prepared or assembled by Contractor under this Contract are confidential and Contractor agrees that they shall not be made available to any individual or organization without the prior written approval of the GOHSEP. This does not extend to information that was obtained from the public domain such as public agencies or sources of information available to the general public.

F. Insurance

Insurance shall be placed with insurers with an A.M. Best’s rating of no less than A-: VI or a self-insurance program approved by GOHSEP. This rating requirement shall be waived for Worker’s Compensation coverage only.

Contractor's Insurance: The Contractor shall not commence work under this contract until he has obtained all insurance required herein. Certificates of Insurance, fully executed by officers of the Insurance Company written or countersigned by an authorized Louisiana State agency, shall be filed with the State of Louisiana for approval. The Contractor shall not allow any sub-contractor to commence work on his subcontract until all similar insurance required for the sub-contractor has been obtained and approved. Any deductibles or self-insured retentions must be declared to and accepted by the Agency. The Contractor shall be responsible for all deductibles and self-insured retentions.

C. OTHER INSURANCE PROVISIONS

The policies are to contain, or be endorsed to contain, the following provisions:

1. Commercial General Liability and Automobile Liability Coverages

To the fullest extent allowed by law, the insurer shall agree to waive all rights of subrogation against the Agency, its officers, agents, employees and volunteers for losses arising from work performed by the Contractor for the Agency.

3. All Coverages
   a. All policies must be endorsed to require 30 days written notice of cancellation to the Agency. Ten-day written notice of cancellation is acceptable for non-payment of premium. Notifications shall comply with the standard cancellation provisions in the Contractor’s policy. In addition, Contractor is required to notify Agency of policy cancellations or reductions in limits.
   b. The acceptance of the completed work, payment, failure of the Agency to require proof of compliance, or Agency’s acceptance of a non-compliant certificate of insurance shall release the Contractor from the obligations of the insurance requirements or indemnification agreement.
c. The insurance companies issuing the policies shall have no recourse against the Agency for payment of premiums or for assessments under any form of the policies.

D. ACCEPTABILITY OF INSURERS

1. All required insurance shall be provided by a company or companies lawfully authorized to do business in the jurisdiction in which the Project is located. Insurance shall be placed with insurers with an A.M. Best's rating of A−:VI or higher. This rating requirement may be waived for workers compensation coverage only.

E. VERIFICATION OF COVERAGE

1. Contractor shall furnish the Agency with Certificates of Insurance reflecting proof of required coverage. F. SUBCONTRACTORS
Contractor shall include all subcontractors as insureds under its policies OR shall be responsible for verifying and maintaining the Certificates provided by each subcontractor. Subcontractors shall be subject to all of the requirements stated herein. The Agency reserves the right to request copies of subcontractor’s Certificates at any time.

2. Contractor agrees to investigate, handle, respond to, provide defense for and defend any such claims, demands, suits, or causes of action at its sole expense and agrees to bear all other costs and expenses related thereto, even if the claims, demands, suits, or causes of action are groundless, false or fraudulent. The State of Louisiana may, but is not required to, consult with the Contractor in the defense of claims, but this shall not affect the Contractor’s responsibility for the handling of and expenses for all claims.

MEMORANDUM FOR: Gerald Stolar

SUBJECT: Sheltering and Temporary Essential Power (STEP)
Pilot Program Guidance for FEMA-4277-DR-LA

August 22, 2016

Today I am issuing the attached Sheltering and Temporary Essential Power (STEP) Pilot Program guidance for FEMA-4277-DR-LA. This Pilot is an innovative approach to addressing imminent threats to life, public health and safety in the aftermath of the recent catastrophic flooding in Louisiana. STEP will enable the State to implement a program, as part of their broader transitional sheltering plan, to help survivors shelter in their own homes, when safe and appropriate. This will reduce the demand for congregate and transitional sheltering assistance by allowing survivors to remain in their communities and keep the fabric of existing communities intact, helping schools to re-open more quickly and hastening the pace of community recovery.

The torrential rainfall and historic flooding beginning August 11, 2016, and which continues, in Louisiana has damaged or destroyed more than 156,000 residences based on FEMA Geospatial assessment and analysis, displacing residents and overwhelming sheltering and temporary housing resources in the affected area. Major flooding and moderate flooding is expected to continue for the next several days. In addition to the flooding, the weather, as is to be expected in the Gulf Coast this time of year, is hot and humid, which heightens the need for quick power restoration in affected homes.

FEMA previously authorized a STEP Pilot Program in 2012-2013 in response to Hurricane Sandy. While STEP for FEMA-4277-DR-LA utilizes the same authority and is aimed at a similar purpose as in Hurricane Sandy, we have altered certain aspects based upon lessons learned and tailored the program for the unique circumstances of this event. Changes include: restricted categories of work specific to work necessary and appropriate for this event, restriction to single family owner occupied residential properties, and the provision that only the State will undertake or contract for the necessary work.

As with any FEMA-funded program, costs must be reasonable, and in this case, costs for this program are capped, with minimal exception to address issues related to access and functional needs, at $15,000 per residence to include necessary equipment, materials, and labor.
I understand that the State is actively developing a program that will operate within the parameters established in the attached STEP guidance for DR-4277-I.A. Based on lessons learned from implementation of STEP in response to Hurricane Sandy in New York, provision of documentation required for determining eligibility and for closeout, as detailed Section VII.K. of the attached guidance, will be key to ensure the success. Close coordination and communication with the State on these matters will be vital to success. Please continue to work closely with the State as they finalize and implement their program.

If you have questions about this guidance, please contact me or have your staff contact Howard Stronach at 202-546-3683.

I. TITLE: Sheltering and Temporary Essential Power (STEP) Pilot Program for FEMA-4277-DR-LA

II. DATE: August 22, 2016

III. PURPOSE:

Torrential rainfall and flooding beginning August 11, 2016 and continuing in Louisiana has damaged or destroyed more than 156,000 residences displacing residents and overwhelming sheltering and temporary housing resources in the affected area. Due to the limited availability of hotels and motels in the affected area, the Transitional Shelter Assistance (TSA) Program is not a viable temporary housing solution for most survivors. To address this need, FEMA is authorizing Public Assistance funding under Section 403 of the Stafford Act for a Sheltering and Temporary Essential Power (STEP) Pilot Program for the State to perform emergency temporary repairs and power restoration in single-family owner occupied residences. Where safe and practicable, STEP may enable residents to return to or remain in their homes as a form of shelter while permanent repairs are completed, thereby reducing the number of individuals in congregate shelters or requiring assistance through the Transitional Shelter Assistance (TSA) Program. STEP will also return survivors and communities to normalcy by allowing schools serving as shelters to open sooner and hastening the pace of overall community recovery.

IV. OBJECTIVES:

A. STEP is intended to save lives, to protect public health and safety, and to protect property. It is also meant to minimize the disruption of the normal functioning of communities by enabling the State to help community members shelter in their own homes, when safe and appropriate. STEP is intended to reduce the continued need for congregate sheltering and Transitional Shelter Assistance.

B. At the request of the State, FEMA will deliver the STEP program through reimbursement to the State. The State intends to perform or contract for the performance of authorized emergency protective measures. Individual residential property owners are not eligible for reimbursement under STEP.

V. SCOPE AND AUDIENCE: This policy is intended to guide all FEMA personnel responsible for providing STEP assistance.
VI. **AUTHORITY:** Section 403, 42 U.S.C. 5170b(a)(3)(B) and (I), and 5170b(a)(4) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended.

VII. **POLICY:**

A. STEP is for single family owner-occupied residential properties only, to include duplexes and townhomes. Other types of owner occupied residences may only be approved by the Regional Administrator on a case by case basis and supported by written justification by the State to include feasibility and cost effectiveness. Commonly owned areas, structures, or equipment are not eligible for removal, maintenance, repair, or replacement under this program.

B. The Governor’s Authorized Representative (GAR) must submit a written request for STEP to the FCO as soon as possible and not later than by September 1, 2016 and, in that request, designate the areas requested for STEP.

C. The written request will include the State’s findings that 1) there exists an immediate threat to lives, public health and safety, and that emergency measures taken through this program are necessary to cope with this threat; and 2) that it has legal responsibility to undertake the proposed actions in response to this threat.

D. Within 30 days of receiving approval from the Federal Coordinating Officer (FCO) to execute STEP, the State must obtain a Right of Entry (ROE) from each property owner on a form approved by FEMA. At the FCO’s discretion, the time period to obtain ROEs may be extended for an additional 30 days. The ROE allows FEMA, the State, or authorized contractors and representatives, access to the property. STEP work will not be initiated on a property without the submission of a ROE. All STEP work must be completed within 60 days after receipt of the ROE. The FCO may approve extensions subject to the project performance deadlines at 44 CFR 206.204(c)(1).

E. Starting no later than 14 calendar days after the State begins executing temporary emergency repair work under the STEP, the State must provide a daily electronic report to include the aggregate number of ROEs obtained; number of properties where work is initiated; and number of properties complete. On a weekly basis, the State must provide an electronic report with the following information on residences that receive assistance under STEP: property owner’s name, address, and FEMA registration number (if applicable—some residences receiving assistance under STEP may not have applied for FEMA Individuals and Households Program (IHP)). The report must also detail the
following for each property: when the signed ROE was obtained; when work was initiated; and when work was completed. The FCO will establish format, data fields, and transmission method for the electronic reports. Changes to the reporting requirements will be mutually agreed upon by the FCO and SCO.

F. FEMA makes no warranties of any sort for any assessments or temporary work undertaken pursuant to this program.

G. Eligible temporary emergency repair measures will be capped at $15,000. Any temporary emergency repairs must be reasonable, necessary, and low cost options to make the home safe for sheltering purposes. If a home cannot be made safe and habitable for shelter purposes for less than $15,000, that property is not eligible for STEP assistance. The FCO may only waive the $15,000 cap on a case by case basis and after the State’s demonstration of increased costs associated with work necessary to make a home safe and habitable for shelter purposes for owner-occupants with access and functional needs.

All temporary emergency repairs must comply with local, State, and federal codes and may include:

a. Removal of debris to curbside including damaged drywall, flooring, carpeting, ceilings, doors, insulation, fixtures and cabinets and other unsalvageable contents;
b. Cleaning and sanitizing interior of residence to include ductwork;
c. Ensure one useable bathroom vanity, sink, toilet, and tank;
d. Drywall replacement only to safely cover electrical shelter-in-place repairs;
e. Repair or replacement of nonfunctioning interior/exterior doors;
f. Remove and/or install floor covering;
g. Inspection, cleaning, repair or demolition and replacement of damaged circuit breakers, panel boxes, electrical conduit, service cables, outlets, switches, and receptacles;
h. Cleaning, testing and minor repair of furnaces, baseboard heaters or central air conditioning. Window air conditioning units may be provided in lieu of repair of central air conditioning. Temporary baseboard heaters may be provided in lieu of repairing furnaces.
i. Repair or replace damaged window air conditioning unit(s);
j. Repair or replace damaged water heaters. Replacement water heaters will be the minimum necessary capacity, but water heaters of similar capacity may be utilized when cost effective;
k. Weatherproofing to include temporary roof, wall, and window repairs;
I. Minor repairs to interior or exterior to provide safe access (e.g., stairs, ramps) and living environment;

m. Asbestos and lead assessment and abatement necessary to make repairs (not pre-existing paint and soldered plumbing fixtures);

n. Inspect, test and repair of natural gas lines, valves, and pipes;

o. Well decontamination if only source of potable water;

p. Inspect and minor repair of plumbing, and sewer or septic components and connections to ensure a safe and sanitary living environment;

q. Access and functional needs items impacted which were pre-disaster owned and damaged as a result of the event.

r. Mini-fridges for doctor prescribed medical needs

H. Any inspections for code compliance or safety necessary to accomplish work eligible under this program are also eligible for funding and not subject to the $15,000 per property cap.

I. Project management and oversight activities and State direct administrative costs are eligible and not subject to the $15,000 per property cap. Project management activities may include a call center to register impacted home owners, inspections, data and document collection, auditing of contractor documentation, outreach, contract monitoring and administration, quality assurance and quality control, and reporting.

J. Implementing the Program.

The State will identify residences potentially appropriate for STEP. To be appropriate for STEP, a residence must:

1. Be located within the geographic area established by the GAR in the STEP request

2. Be structurally sound, such that authorized temporary emergency repairs can be safely made, and with no impediments blocking access to the dwelling; and

3. Be reasonably able to serve as a suitable shelter upon completion of the temporary emergency repairs authorized under this program.

K. State Requirements.

1. The State will submit a formal request for approval of STEP.
2. The State or its contractors will perform all project management activities to include oversight and monitoring of damage assessments, repair work, code compliance, safety inspections, and ensure occupancy requirements are met for all properties.

3. The State or its contractors will obtain a signed ROE agreement, within the timeframe established above, from each residential property owner for the type of work to be performed.

4. The State is responsible for obtaining, accelerating and facilitating the issuance of any and all permits required to complete the eligible work and will arrange, accelerate, facilitate any and all inspections required by State or municipal law, and obtain clearance for temporary occupancy for each property.

5. The State will ensure the owner recognizes and certifies their understanding that participation in STEP will make a FEMA IHP applicant ineligible for further TSA assistance, if authorized, or subsequent lodging expense reimbursement once emergency temporary repairs are complete and the residence is cleared for occupancy.

6. The State must comply with the Federal procurement standards under grants in 2 CFR 200.317-326. The State will provide FEMA the opportunity to review the procurement plan to provide for this work.

7. The State, or its contractors, will obtain documentation to verify primary residence and ownership as follows:
   a. Primary Residence
      i. Utility Bill
      ii. Merchant’s statement
      iii. Driver’s License
      iv. Voter’s Registration card, or
      v. Employer’s Statement, such as a wage or earnings statement, AND
   
   b. Home Ownership Verification
      i. Structural Insurance
      ii. Tax Bill
      iii. Official’s Records - notarized document confirming long-term ownership. An original deed or deed of trust to the property,
listing the applicant as the legal owner.

iv. Mortgage Payment Book
v. Affidavit, or
vi. Title Number after viewing an official government document verifying the home address and applicant to own the dwelling

8. The State will submit to FEMA (frequency and means of transmission to be established by the FCO) the supporting documentation below for each property to include:
   a. Owner/occupant's name and address
   b. FEMA Individual Assistance registration number, if applicable
   c. Right of entry
   d. Flood insurance policy or certification of no flood insurance
   e. Photos of damage
   f. Damage description and scope of work required
   g. Work orders for each property describing costs and specific work performed at the property (i.e. debris removal, dry wall removal, installation of air conditioning units, etc.). Start and stop dates of work must be included.

9. The State will submit project for closeout within 120 days of completion of work at final property address.

I. Effect on Other Assistance.

1. STEP assistance is generally temporary in nature and is an emergency protective measure; therefore, STEP emergency protective measures do not affect a FEMA IHP applicant's eligibility for financial assistance, repair, replacement, or permanent or semi-permanent housing construction assistance under section 408 of the Stafford Act and its implementing regulations.

2. Participation in STEP will make a FEMA IHP applicant ineligible for further TSA assistance, if authorized, or subsequent lodging expense reimbursement once emergency temporary repairs are completed.

M. Removal of debris off of a property and beyond the public right-of-way is not covered under STEP. For information on debris removal from private property see FEMA's Public Assistance Program and Policy Guide dated January 1, 2016.
