

Mobile Command Post

Emergency Management Mobile Communications Assets

OVERVIEW

The GOHSEP Mobile Command Post (MCP) provides response and support mobility, interconnectivity and interoperability between state and local emergency response entities. Because of the flexibility of this asset, it may be strategically placed to respond to most threat scenarios.

The MCP has operational capability regardless of the incident scene conditions. It may be hard-wired to local power, telephone, cable television and internet systems or operated independently with onboard generators and satellite connectivity for telephone, television and data connectivity.

KEY CAPABILITIES

• Conference & Operation Rooms

Radio Equipment
