

Recovery Plans

This course offers a high-level, introductory overview into natural disaster recovery with a focus on how the entire emergency management cycle is critical for effective recovery. Attendees will receive instruction and be provided with sample documents and checklists to better prepare for short-term and intermediate recovery. By the end of this course, participants will improve coordination and increase resiliency among residents and communities following a disaster.

What participants will learn:

- Damage Assessments
- Declaration Process & Assistance Programs
- Unmet Needs Assessments
- Survivor Outreach
- Recovery Support Functions
