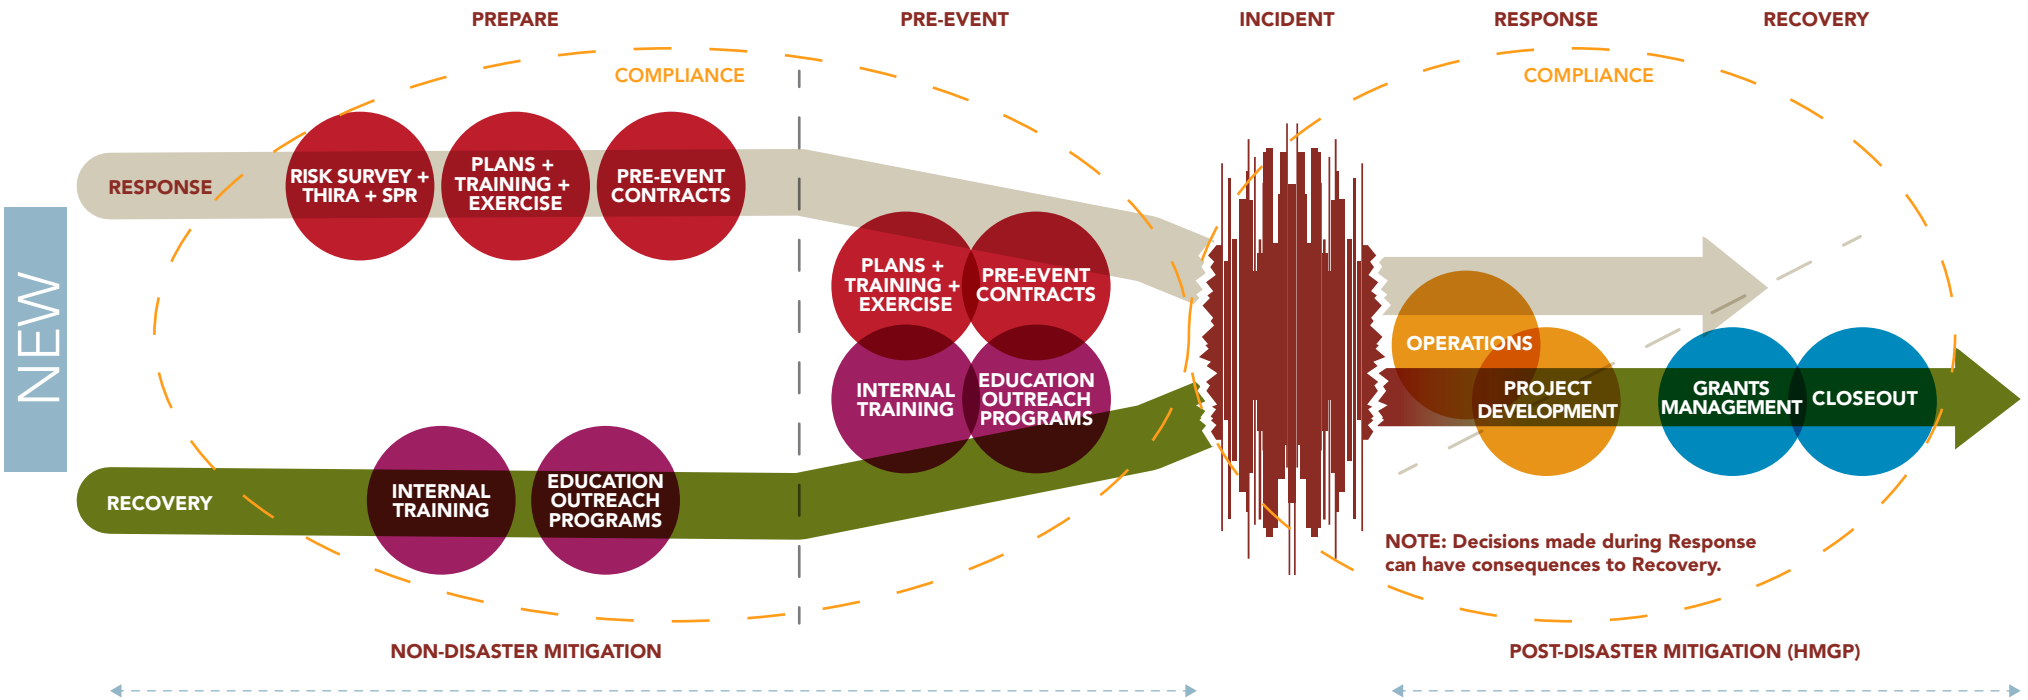
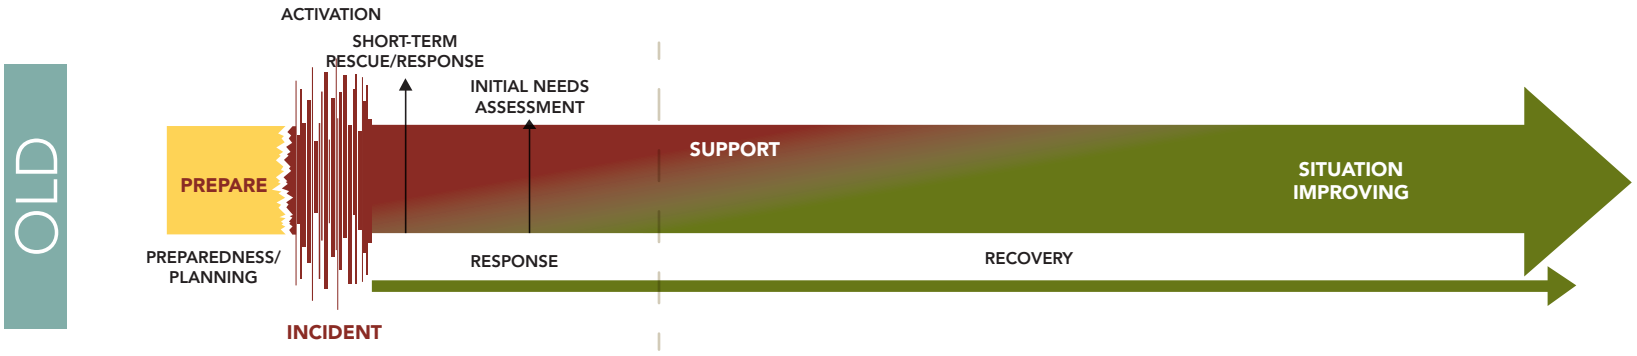
PARADIGM SHIFT: PREPARE. PREVENT. RESPOND. RECOVER. MITIGATE.





LEGEND

HMGP – Hazard Mitigation Grant Program — available post-disaster.

Risk Survey – A series of questions that, when completed, identify risk and the capability to respond to that risk. The *Risk Survey* informs the development of a *Risk Assessment, State Preparedness Report* (SPR) and *National Incident Management System* (NIMS) *Compliance Report*.

Threat + Hazard Identification + Risk Assessment (THIRA) – THIRA is based on the analysis of *State Hazard Mitigation Plans*, historical occurrences, Presidential disaster declarations and general threat assessments. It provides a comprehensive approach for identifying risks and their associated impacts through the lens of the *31 Core Capabilities* identified by U.S. Department of Homeland Security (DHS) and defined in the *National Preparedness Goal* (NPG).

State Preparedness Report (SPR) – Assesses current preparedness levels against *Capability Targets* set in the THIRA.

getting it right!
